ENGINEERING FABRICATION

HVTC APPRENTICESHIP

Certificate III Engineering - Fabrication Trade

QUALIFICATION

Upon successful completion of the course you will receive a nationally recognised qualification.

SKILLS AND ATTRIBUTES

- Show a demonstrated commitment to Workplace Health and Safety.
- Have an interest in practical work using your hands and tools.
- Ability to read and understand technical drawings.
- Able to work with others in a manufacturing, engineering or related environment.
- Have a 'can-do' attitude and approach.

COURSE DESCRIPTION

You will acquire skills and knowledge in workplace communication, work health and safety, quality procedures systems and planning, engineering measurement, plus industry specific skills in welding, boilermaking and fabrication relevant to your current or intended employment.

CAREER OPPORTUNITIES

Welding, Boilermaking or Sheetmetal tradesperson.

TERM OF TRAINING

48 months nominal term (4 years).

WAGES

Pay rates are as per the relevant Modern Award.

RESULTS

Our apprenticeship completion rates are significantly higher than the industry average of 50%. That's because our caring staff provide ongoing support and mentoring throughout your entire training.

We employ you direct - looking after your wages, workers' compensation, leave entitlements and superannuation. This allows your host employer to give you the best work experience possible to help you become job ready.

We deliver onsite and offsite skills development training at our HVTC Skills Centre as well as partner with TAFE and other training providers.

HOW TO APPLY

When a vacancy is available the details will be placed online. For full selection criteria and to apply, go to our website.

Gain a nationally recognised qualification through HVTC, Australia's oldest and largest group training organisation.

We have employed and provided training to 18,000 apprentices and trainees for more than 30 years.
